

## *Fixation PLUM*

A top technology

### Fixation ski touring

Located in the heart of "Vallée de l'Arve", one step aside the "Mont Blanc" exceptional game field for ski resorts, we have designed Plum as the true son of passion and precision turned parts.

Our bindings are entirely built from scratch, using the best possible materials and very modern control machine-tools handled by a highly qualified team.

The development of our bindings has been supervised, tested and validated by the best Alpine skiing professionals. Hence, it brings us in straight connection to the competition. The small size of our company is also a guarantee of high responsiveness towards our customers.
